

PATHAN MOHAMMED IBRAHIM KHAN

Senior Full Stack Developer ·  Available for Remote Opportunities Worldwide

✉ pibrahimkhan001@gmail.com | ☎ +91 90303 84207 | 📍 Hyderabad, India (IST / UTC+5:30)

PROFESSIONAL SUMMARY

Senior Full Stack Developer with 6+ years of experience delivering enterprise-grade web applications for global fintech and e-commerce clients. Specialises in **React, TypeScript, Node.js, and AWS cloud architecture**, with a strong domain background in **financial systems, waterfall distribution platforms, and API-first design**. Proven ability to collaborate asynchronously across time zones, deliver production-ready solutions independently, and own full delivery cycles from architecture to deployment. Actively seeking remote roles with international teams.

6+ Years Experience	Remote-Ready Async · Overlap-Friendly	IST / UTC+5:30 Flexible Hour Coverage
-------------------------------	---	---

TECHNICAL SKILLS

Frontend	React.js · JavaScript (ES2022+) · TypeScript · HTML5 · CSS3
Backend	Node.js · Express.js · REST APIs · Microservices · Serverless
Cloud & DevOps	AWS (S3, DynamoDB, EC2, Lambda, IAM, CloudFormation) · CI/CD Pipelines
Databases	MongoDB · MySQL · DynamoDB
API & Tools	Swagger / OpenAPI · Investran API · Git · Postman
Practices	API Security · System Design · Agile / Scrum · Code Review · Tech Documentation
Remote Stack	Slack · Jira · Confluence · GitHub · Async communication

PROFESSIONAL EXPERIENCE

Citco Group Services | *Senior Full Stack Developer – Waterfall Platform* Sep 2024 – Present
Citco is a global leader in alternative investment fund services. Stack: React · TypeScript · Node.js · AWS DynamoDB · S3 · Swagger

Platform Engineering

- ▶ Engineered and shipped production features for an enterprise financial waterfall distribution platform serving global fund managers, enabling complex multi-tier profit allocation workflows.
- ▶ Designed and delivered full-stack solutions (React + TypeScript + Node.js) for new client onboarding, reducing configuration lead time by streamlining reusable workflow components.
- ▶ Led a backend modernisation effort, migrating legacy Node.js routes to strictly-typed TypeScript, improving long-term maintainability and onboarding speed for new engineers.
- ▶ Built and documented production-grade RESTful APIs using Swagger / OpenAPI, adopted as the integration standard across cross-functional teams.
- ▶ Integrated AWS DynamoDB and S3 for high-availability data storage, document management, and audit trail support aligned with financial compliance requirements.
- ▶ Collaborated with Investran API teams to integrate third-party financial data feeds, ensuring data consistency across client-specific calculation pipelines.
- ▶ Drove API performance optimisation efforts, improving response throughput for large-scale financial datasets and high-concurrency query patterns.

Architecture & Cross-functional Impact

- ▶ Co-designed a scalable stateless REST architecture for the waterfall calculation engine, including DynamoDB data modelling optimised for financial reporting access patterns.
- ▶ Built modular, reusable React component libraries for client-specific financial workflows, significantly reducing duplication across teams.
- ▶ Led knowledge-transfer documentation initiatives, cutting new-hire ramp-up time and reducing team dependency on key individuals.
- ▶ Partnered with Product, QA, and Backend teams across time zones to deliver client-specific enhancements within sprint cycles.

Nextcrack Technologies Pvt Ltd | Full Stack Developer Jan 2020 – Sep 2024

Delivered three independent product platforms across hosting, e-commerce, and food delivery verticals.

Hostbricks — Hosting Automation Platform

- ▶ Integrated WHMCS billing with WordPress for end-to-end hosting automation, enabling self-service client provisioning.
- ▶ Managed and scaled AWS infrastructure (EC2, Route53, Lightsail) supporting multi-tenant hosting operations.
- ▶ Automated deployment pipelines with AWS CloudFormation, achieving repeatable zero-downtime provisioning.

Grocelly — E-commerce Grocery Platform

- ▶ Built a cross-platform grocery delivery application using WooCommerce and Ionic, serving a multi-city customer base.
- ▶ Developed event-driven microservices on AWS Lambda and API Gateway, enabling serverless, auto-scaling backend processing.
- ▶ Implemented a multi-channel notification engine (Email via SES, SMS via SNS, Push) improving delivery-status communication.

Foodlly — Food Delivery Application

- ▶ Developed a full-stack food delivery platform (React + Node.js) from zero to production, including real-time order tracking.
- ▶ Integrated Razorpay and Stripe payment gateways, supporting multi-currency transactions with webhook-based reconciliation.
- ▶ Architected and deployed a CDN-backed, auto-scaling AWS infrastructure (CloudFront + S3 + EC2) for high-availability delivery.

PERSONAL PROJECTS

Pioneer Academy Platform | Full Stack · Educational SaaS | github.com/pibrahimkhan001/pioneer-academy-platform

Stack: React · TypeScript · Node.js · MongoDB · AWS · REST APIs

- ▶ Designed and built a full-stack educational platform from scratch, applying the same enterprise patterns used in production fintech systems to a real-world SaaS product.
- ▶ Architected a scalable content management and delivery system supporting course creation, student enrolment, and progress tracking workflows.
- ▶ Implemented a custom REST API backend with role-based access control (RBAC), JWT authentication, and secure data handling for educator and student personas.
- ▶ Deployed the platform on AWS with a CI/CD pipeline, demonstrating end-to-end ownership across design, development, and infrastructure.
- ▶ Showcases independent project delivery capability — a key signal of readiness for autonomous remote engineering roles.

EDUCATION

B.Tech – Computer Science Engineering | Graduated 2019

Jawaharlal Nehru Technological University Anantapur (JNTUA)

REMOTE WORK READINESS

Available for **full-time remote roles** with teams in EU, US, UK, Middle East, or APAC. IST timezone (UTC+5:30) provides natural overlap with UK mornings and US East Coast afternoons. Experienced with async-first workflows, written communication, and

distributed sprint ceremonies. Home office setup with dedicated workstation, stable fibre internet, and availability for timezone-aligned standups.
